Skills

- Python
- Django
- HTML
- CSS
- JavaScript
- Bootstrap
- React
- Flutter

PROJECTS

Snake Game

Developed a classic Snake game using Python and the Pygame library. Demonstrates proficiency in object-oriented programming, game mechanics, and user interaction

Quiz Web App

Developed a full-stack quiz platform using Django REST Framework for the backend and React for the frontend. Implemented user authentication (signup/login) and secured API endpoints for user access. Designed an interactive quiz interface with real-time answer validation, allowing users to track their progress dynamically. Integrated a progress tracker (e.g., "Question 3 of 10") to enhance user engagement. Added a dark mode toggle for better UI accessibility. Utilized Bootstrap for a responsive and visually appealing design. Optimized API performance for smooth data retrieval and submission. Followed best practices in REST API development and frontend state management. The project improved my skills in full-stack development, API integration, and UI/UX enhancements.

E-commerce Website

Developed a fully functional e-commerce website with Django, enabling users to browse products, create accounts, and manage their profiles. Implemented user authentication (login/sign-up) and an admin panel for product management. Integrated responsive design using Bootstrap to ensure a seamless user experience across devices. Features include a product catalog, detailed product pages, and a contact form.

Key Technologies: Django, Python, HTML, CSS, JavaScript, Bootstrap, SQLite

EDUCATION

Krishna Engineering College

Bachelor of Technology in Computer Science & Engineering - IT 2021-2025

COURSES

1) Google's Cyber Security:

Successfully completed Google's Cyber Security course and received a certificate and badge. Demonstrates a proactive approach to learning and a keen interest in cyber security.

2) IBM SkillsBuild :

- **Web Development Fundamentals** : This comprehensive course provided a solid foundation in the core principles of web development, including HTML, CSS, and JavaScript. I gained hands-on experience building interactive web pages and understanding best practices for user experience.
- **Project Management Fundamentals** : This course equipped me with the essential knowledge and tools for effective project management. I learned about project planning, execution, monitoring, and control, which will be valuable for any technical role requiring organization and teamwork.
